

Design altered to address WSCC concerns regarding the proposed junction vis splay looking east from the new highway onto Lyons Road, as they were previously shown to the centre line of Lyons Road as per MFS2, rather than the northern kerb line as per MFS. The speed/count survey has the 85th percentile speed as 36mph eastbound and 35mph westbound, both greater than the actual speed limit (30mph), thus the proposed junction vis splays from the new junction will need to be 56m, rather than the 43m previously shown.

1. Accept that the approach speeds are 35/36mph and provide the requisite junction visibility splay of 2.4x56m, with 1m indent from channel as agreed with WSCC - email dtaed 13/11/19
- 1.1. Note that moving the existing kerb lines approx 1m south enables us to comply with MFS vis splays requirements, whilst just avoiding boundary pinch point @ A, but subject to interpretation of WSCC adopted areas appears to avoid boundary conflicts at pinch point @ B.

- Design subject to confirmation of
- both northern and southern boundary positions.
 - existing adopted highway extent
 - WSCC subsequent approval of revised layout - informal approval 12/11/19 subject to formal submission and amended RSA1

NOTES
